

Trip and Tree is the programme that allows our customers to take action for the planet and **reduce the environmental impact of their trip.**

When purchasing an air ticket on www.airfrance.com, volunteer customers can make a donation of the amount of their choice to finance one of the tree planting projects around the world.

Make a donation to support tree planting

Air France customers can support **the project and the planting site of their choice** from a proposed panel, including planting projects in Togo, Thailand, Bali, Ecuador, Madagascar and France.

Tree planting can notably be used to protect biodiversity, help populations, store carbon, enrich the soil and replenish water. With Trip and Tree, Air France aims to create the first community of eco-travellers.

Thaïlande :

In the **region of Isan**, with organic rice producers

a Tree for You

The Trip and Tree programme, created in January 2019, is developed by A Tree for You, a non-profit association under the French law of 1901.

A Tree For You brings together in complete transparency donors and tree-planting projects from around the world.

The projects are operated by tree-planting partners who have been successfully working in the field for several years such as the GoodPlanet Foundation, Pur projet, Agrisud International and APAF (Association for the Promotion of Fertilizer Trees) abroad, and Plantons pour l'avenir or the French Agroforestry Association in France.

The projects are selected by a committee of independent and volunteer experts with recognized expertise.

A Tree For You receives financial, moral and operational support from Air France, the French Civil Aviation Authority and France's public inland waterways authority (Voies Navigables de France (VNF)).

Acting together to ensure a responsible travel experience
